

Citadel 4 USB StorageTM

"Servers and Storage Built for the Security Industry"

The AGS Citadel 4 USB Storage JBOD is manufactured using only top-of-the-line Intel and Intel certified components. The AGS Citadel 4 USB Storage JBOD is proudly made in America and is designed to operate continuously under the rigorous demands of an IP video surveillance system. Standard storage units only have to process the occasional read/write requests that occur when loading applications, surfing the Internet and saving or retrieving documents. Video surveillance storage requires continuous writing of video to the storage media. AGS uses enterprise grade storage that is designed for the continual read/write requirements of a video surveillance system. This assures that any recorded surveillance video will be available when it's needed.

AGS has over 30 years of computer engineering experience which goes into every system that we build. Endless hours go into every prototype before it becomes an AGS product. You can be certain that an AGS system will operate at peak efficiency today, tomorrow and in the future.

All AGS systems come with a standard 3 year warranty with advance replacement on all Intel components. Once an AGS system is installed, you can rest assured that it will operate trouble free without the need for constant maintenance and service calls.

AGS systems are currently being used at International Airports, Banks, Casinos, Universities, Healthcare Facilities, Fortune 500 Companies and Federal, State and Local Government Facilities. AGS systems are the most intelligent solutions for any mission critical video surveillance system.

The AGS Citadel 4 USB Storage JBOD is built to last and designed to operate under the most demanding conditions. Install an AGS Citadel 4 USB Storage JBOD and you can have the same piece of mind as the Federal Bureau of Investigation (FBI), the Massachusetts Institute of Technology (MIT), Trump Plaza Casino, and the University of Cincinnati.

The AGS Citadel 4 Storage JBOD can be configured with up to four (4) drives using either 1TB or 2TB enterprise grade hard disks. Different configurations can provide the user with raw storage capacity ranging from one (1) to eight (8) terabytes allowing this small desktop device to store an impressive amount of surveillance video. The AGS Citadel 4 Storage JBOD is the perfect solution for Small Office/ Home Office surveillance video storage.

The AGS Citadel 4 Storage JBOD has been certified with the NVR application software offered by the following companies:

- Pelco
- OnSSI
- Axis
- Milestone
- Lenel
- Strand
- Bosch
- Genetec
- Salient
- Cisco
- IPconfigure
- JDS

CitadelTM 4 USB Storage

"Servers and Storage Built for the Security Industry"

PART NUMBER: AGS-USB4-xx (xx = 01 up to 08 Terabytes)

TECHNICAL SPECIFICATIONS

- Ultra Small Form Factor 4 drive "Lunchbox" Chassis
- Up to 8 Terabytes of Raw Storage using 1TB or 2TB Drives
- External JBOD Storage
- 4 - USB 2.0 Interconnect for External Host and JBOD Interface
- 200 Watt Power Supply
- Voltage: 100VAC to 240VAC (with +/- 10% tolerance)
- Frequency: 47 Hz to 63 Hz
- Power Factor Correction: 95% @ 110VAC, Full Load
- 9" H x 7" W x 10.6" D
- Weight (Complete System) Approximately 21 lbs

Operating Environment: 64°F - 75°F @ 35-55% RH non-condensing. Non-Operating Environment: 55°F - 95°F @ 10-90% RH non-condensing

It is the client/end user's responsibility to provide the proper mechanical/electrical/plumbing/fire protection (MEPFP) and IT environment that conforms to the Uptime Institute Tier 1 requirements and all applicable Federal, State, County, & Local codes & standards (UTI, EIA/TIA, BICSI, etc.).

This system has been engineered to work with each component to the best usage of optimal computer power. The Computer industry's components change on a regular basis.
