

# Reliance<sup>TM</sup> 6 Server Series

*“Servers and Storage Built for the Security Industry”*

The AGS Reliance 6 stand-alone video surveillance server is manufactured using only top-of-the-line Intel and Intel certified components. The AGS Reliance 6 server is proudly made in America and is designed to continuously operate under the rigorous demands of an IP video surveillance system. Standard servers only have to process the occasional read/write requests that occur when loading applications, surfing the Internet and saving or retrieving documents. Video surveillance servers require a high level of processing power while continually writing video to the storage media. AGS uses enterprise grade storage that is designed for the continual read/write requirements of a video surveillance system. This assures that any recorded surveillance video will be available when it's needed.

AGS has over 30 years of computer engineering experience which goes into every system that we build. Endless hours go into every prototype before it becomes an AGS product. You can be certain that an AGS system will operate at peak efficiency today, tomorrow and in the future.

All AGS systems come with a standard 3 year warranty with advance replacement on all Intel components. Once an AGS system is installed, you can rest assured that it will operate trouble free without the need for constant maintenance and service calls.

AGS systems are currently being used at International Airports, Banks, Casinos, Universities, Healthcare Facilities, Fortune 500 Companies and Federal, State and Local Government Facilities. AGS systems are the most intelligent solutions for any mission critical video surveillance system.

The AGS Reliance 6 server is built to last and designed to operate under the most demanding conditions. Install an AGS Reliance 6 server and you can have the same piece of mind as the Federal Bureau of Investigation (FBI), the Massachusetts Institute of Technology (MIT), Trump Plaza Casino, and the University of Cincinnati.

The AGS Reliance 6 server can be configured with up to six (6) drives using either 1TB or 2TB enterprise grade hard disks. Different configurations can provide the user with raw storage capacity ranging from one (1) to twelve (12) terabytes allowing this small footprint device to store an impressive amount of surveillance video. RAID5 and RAID6, both with optional hot spare, are supported for additional redundancy and reliability.

The AGS Reliance 6 server has been certified to run the NVR application software offered by the following companies:

- Pelco
- OnSSI
- Axis
- Milestone
- Lenel
- Strand
- Bosch
- Genetec
- Salient
- Cisco
- IPconfigure
- JDS

# Reliance 6 Server Series™

“Servers and Storage Built for the Security Industry”

## TECHNICAL SPECIFICATIONS

- Intel 6 Drive Tower or Rack Mount Server Chassis
- Up to 12 Terabytes of Raw Storage
- Core Duo or Quad Core Xeon Processor
- 2.4 up to 3.0 Ghz Per Core
- JBOD, RAID5, RAID5 + Hot Spare, RAID6 or RAID6 + Hot Spare
- Keyboard and Mouse Included

Operating Environment: 64°F - 75°F @ 35-55% RH non-condensing  
 Non-Operating Environment: 55°F - 95°F @ 10-90% RH non-condensing

It is the client/end user's responsibility to provide the proper mechanical/electrical/plumbing/fire protection (MEPFP) and IT environment that conforms to the Uptime Institute Tier 1 requirements and all applicable Federal, State, County, & Local codes & standards (UTI, EIA/TIA, BICSI, etc.).

This system has been engineered to work with each component to the best usage of optimal computer power. The Computer industry's components change on a regular basis.
